Changes needs to be done:

About Investment Guru

Investment Guru is a financial education and consulting company that helps people understand the share market in a simple and practical way. Our goal is to make stock market learning easier for everyone and help individuals make better, more confident investment decisions.

We believe that financial knowledge should be accessible to everyone, whether you are completely new to the share market, already have some experience, or are an experienced investor. That is why we provide stock market education, market analysis, training programs, and personalized mentorship designed for different levels of investors.

At Investment Guru, we focus on explaining complicated stock market concepts in a simple, practical, and easy-to-understand manner. We believe learning about the market should not feel confusing or difficult. Instead, our approach is to connect knowledge with real market situations so that learners can understand and apply what they learn.

Through our Share Market Training Programs, classes, workshops, and mentoring sessions, we aim to develop more than just investment knowledge. We help learners build the confidence, discipline, patience, and right mindset needed to make informed decisions and grow as investors.

Our mission is not simply to teach people how to invest. We want to help people understand the market, avoid uninformed decisions, and become more responsible and confident investors.

Through continuous education and practical guidance, Investment Guru is committed to supporting aspiring investors on their journey toward financial growth, better investment decisions, and greater financial independence.

Who am I???

Brief Introduction:

Amit Jha is the Founder and Managing Director of Investment Guru, a leading financial education and consulting platform dedicated to empowering individuals in the share market. He holds MBA in Finance and has more than seven years of experience in the Nepalese stock market (NEPSE).

As an active investor, Amit has invested in hydropower, finance, and several other sectors, giving him practical, real-world experience beyond theoretical knowledge. His deep understanding of market trends, fundamental analysis, portfolio management, and investment strategies has helped many investors make informed financial decisions.

Passionate about financial literacy, Amit believes that everyone should have access to quality stock market education. He is known for his simple, practical, and easy-to-understand teaching style, which makes complex market concepts accessible to beginners and experienced investors alike.

As the lead mentor of the IG Learning Club and Share Market Training Programs, Amit personally conducts classes, workshops, and mentoring sessions. His goal is not only to teach people how to invest but also to help them develop the confidence, discipline, and mindset required for long-term success in the stock market.

Through Investment Guru, Amit continues to inspire and guide thousands of aspiring investors on their journey toward financial growth and independence.

- Understand the basics of the stock market, even if you are a complete beginner.
- Learn how to analyze stocks using both technical charts and fundamentals analysis.
- Learn how to build a balanced stock portfolio and manage it effectively.
- Understanding when the market is strongly rising (Bull market) or falling (Bear Market).
- Learn strategies of entry and exit points for buying and selling shares.
- Learn how to identify signs of strong participation by large or institutional investors in stocks (broker analysis).
- Understand the power of compounding and how long-term investments can potentially grow over time.

Advance Smart Money Concept / Inner Circle Trading (SMC /ICT) – For Intermediary

This course provides an in depth understanding of Smart Money Concepts (SMC) and explains how institutional players participate in the financial market and how their activities influence price movements.

From the basics of market structure to modern trading techniques, the course focuses on practical learning. Through the example of real market scenario, chart analysis, and chart drills, participants will learn how to understand price movements, identify liquidity zones, and apply SMC strategies in market.

The goal of this course is not only to teach SMC strategies but also to help traders to analyze the market systematically and make clear, more disciplined, and strategic trading decisions.

Who Is This Course For?

- Traders who want to understand Smart Money Concepts (SMC) and institutional trading techniques.
- Traders who want to improve their understanding of Market Structure, Liquidity, and Price Action.
- Individuals interested in learning advanced and modern trading strategies.
- Financial analysts and market participants who want to better understand Market Dynamics and Price Movement.

What You Will Learn

- Understand the key concepts and strategies of Smart Money Concepts (SMC).
- Identify and use important reference points used by institutional traders.
- Learn to analyze Market Structure using a Top Down Approach.
- Use SMC tools to apply advanced trading strategies.
- Develop a better understanding of Trading Psychology and Risk Management.

- Understand Price Movement and Liquidity to make more structured trading decisions.
- Learn how institutional trading techniques can influence market behavior.
- Develop the ability to study Market Dynamics and Price Action more effectively.

Intraday Trading (Coming Soon)

Intraday Trading means process of buying and selling shares within the same trading day. In Intraday trading, traders close their positions before the market closes. The main objective is to take advantage of short-term price movements to generate potential profits.

What You Will Learn

- **Short-Term Trading:** Shares are bought and sold within the same trading day.
- **Focus on Price Movement:** Traders look for opportunities from short-term price fluctuations.
- **Market Analysis:** Charts, trends, support and resistance, volume, and other technical indicators are used to analyse the market.
- **Entry & Exit Planning:** The price at which to enter and exit a trade is planned in advance.
- **Stop Loss:** A stop-loss is used to control and limit potential losses.
- **Risk Management:** Managing how much risk to take on each trade is given high priority.
- **Timing:** Identifying the right time to enter and exit the market is very important.
- **Quality Over Quantity:** Instead of taking too many trades, traders focus on high-quality trading opportunities.
- **Same-Day Position Closing:** Intraday positions are generally closed before the market closes on the same trading day.
- **Systematic Trading:** Short-term market movements are treated as opportunities, while trading is conducted systematically with proper risk management.
